"The little Republic, which is approximately equal in area to Holland and Belgium together, is bounded on the north-west by the British colony of Sierra Leone, and on the south and east by French territory, the limits of which have not been precisely ascertained. It was founded in 1822, mainly by philanthropic effort, as a place of settlement for emancipated American slaves, under the protection, more or less formal, of the United States. In 1847 it was raised to the status of a free and indepenlent Republic, which, having first been recognized by Great Britain and afterwards by France, ultimately received recognition from other countries, and, in 1861, from its American "motherland." Its Constitution is a copy in miniature of that of the United States, with a President, a House of Representatives, a

Senate, and a Supreme Court. "Few of the present colonists have themselves been in a servile condition; and the President, though a full-blooded negro, is a West Indian and a gentleman of education and refinement, earnestly devoted to the interests

Under Sir H. H. Johnstone "a syndicate was formed, which has now grown into the Liberian Development Chartered Company. . . . In January, 1906, it had already invested £100,000 in Liberia; and in February of the same year two British officials were appointed to reorganise the Customs and financial conditions of the Republic. Public works have been commenced, motor roads are being pushed into the interior, and, as soon as the nature of their operations becomes understood, the pioneers hope to secure an amount of assistance from the inhabitants, whether private or official, which up to this time has been only tentatively extended to them. The ruling classes of the country—that is to say, the emancipated or other coloured colonistsappear to entertain some not altogether unnatural jealousy of outside interference. Foreigners, as white people are called, ar not allowed to have houses of business in the interior, but only on the frontiers. . . .

"With a tranquil population and an orderly Government, possibly more congenial to the natives than that of white people, there seems to be good reason to hope that European enterprise, if conducted on reasonable lines and with a proper regard for the interests of the natives, will be rewarded by success, and that the little State, which for so many years has been in a state of something like suspended animation, will rouse itself into more vigorous life, and perhaps after all justify some of the expectations of its original founders, who looked to it to demonstrate the capacity of the negro race for self-government."

THE DISCOVERY OF FRAGMENTS OF MENANDER

Commenting upon the valuable finds of papyri to which we referred in a previous issue the "Times" says :-

M. Maspero, the distinguished French Egyptologist, gives some interesting parti-(Router) ago by M. Gustave Lefebvre, Inspector of the Egyptian Service of Antiquities, and since published by him at the expense of the Khedivial Government. The papyri containing these fragments were discovered in digging the foundations of a house in the village of Kom-Ichgaou. Among the objects dug up by Telegrams from Constantinople announce M. Lefebvre were some 30 rolls of Greek or secret for nearly ten months until the ground what aweary of the routine of my life on the travelling with us as betrothed to my daughter. BUYING OFFICE 36 NOBLE SP., LONDON was thoroughly searched in order to be sure backwaters of the Nile, where dams are seen Amasis, beguiled me one lovely morning to a that nothing was left.

> expected presence of an incomplete volume Menander's works "in a miserable town of the Said among people who will hardly have spoken anything but Egyptian." The manuscripts which accompanied it came from the archives of a family or of a notary, and contained the testament of a person who lived at the beginning of the sixth century of our era, be incidentally offered the observation that the - indeed, what game have we not played !-- it but whose property was situated at a considerable distance from Ichgaou-that is to say, at Antinoë and its vicinity. It is, therefore, considered probable that the bulk of the objects found together with the papyrus itself will have come from Antinoë, and it absent pages are ever discovered, it will doubtless be in the ruins of that town or of the adjoining Hermopolis.

Forty-four pages have have been saved, some complete and others badly damaged, so that in some parts M. Lefebvre had great difficulty in restoring the text. He has, how forming part of four comedies. Ancient citathem were "The Arbitration" and the "Perikeiaccuracy. The Arbitration, for instance, is the sit at the receipt of custom in the vestibules and is not quite absent from the "Parikeiromene," although in the latter the main feature is different. Part of another copy of the same play discovered five years ago at Behnesa by Bristol MM. Grenfell and Hunt give the happy com

In support of this statement he sum marizes the scene from which "The Arbitration takes its name.

> He points out that until recent years Menander's reputation as a great writer and the regret for the loss of his comedies were based exclusively on the opinion of antiquity. How, he asks, will Menander accommodate himself to that stroke of fortune which has restored part of his work to the modern world While this resurrection is most formidable for Menander, owing to his very high reputation, M. Maspero nevertheless considers that it will not be too much to his disadvantage. Casar's saying that Terence was one half of Menander appears to him to characterize the latter as exactly as the former, now that we are in possession of very long passages from several his pieces. He shows the same qualities of delicacy and grace, but sublimated, so to speak, Egyptian Black Cat, Princess Cinders. and generously enriched by that comic force the absence of which Casar deplored in the Latin author. The leading figures are more firmly drawn, the situations developed with more spirit, the dialogue more rapid, and the style more vivid. He fears, however, that the The subjects are not particularly interesting and the characters are rather conventional What compensated formerly for their weakness the language and its wit, still more than the accuracy and drollery of the observation-that is to say, precisely the element most difficult to appreciate instinctively in a dead language. M. Maspero's final conclusion is that "Menander will become a source of enjoyment for a few, who will gladly bear witness to his merits, but he will remain for the rest what he was before, that is to say, a great man on the evidence o
